Suppliers	No suppliers are registered as working with this authority. If you work with this authority, click here to link your details to this authority.
Documents	No documents visible to suppliers are available for this organisation.
Products used	No supplier products have been associated with this organisation.

The top half of the page contains contact and reference information.

The lower half links to any projects the authority is involved in, and lists all suppliers and products registered as in use by the authority.

Finally there is a list of documents the authority has shared with suppliers at the bottom of the screen.

● Contact details tab

The contact details tab is used to display a contact from your organisation who should be contacted in relation to this project.

By default it will be populated with your contact details, but you can change these if you wish.

You set view permissions for each tab of the project, the view rights are the same for each tab:

Local:	This will show the project only to the authorities listed as involved
Partnership: the	If a partnership is involved in project, the project will be shown to all members of the partnership
Public:	This will list the project to all users
Supplier members:	This will list the project to supplier members

● Links tab

This tab links the project to services, interactions and channels in the esd-toolkit.

Click the tree picker icon next to each field to select items that this project relates to.

You can also select National Projects and PSTOs that are relevant to the project from the pick list.

These will categorise the project into the relevant areas of esd-toolkit.

● Project suppliers tab

This is the tab to specify your organisation's involvement in the project.

Select from the pick list the areas of the project that you assisted with.

You can select your company's products from the "Use of products" pick list.

The involvement box is a free text space for you to describe your involvement in more detail.
